

ANDREW EVERS

Chief Technology Officer

Andrew Evers is responsible for the architecture and development of Cronacle®, SAP® CPS by Redwood, Report2Web®, Redwood's vertical solutions, and Cronacle.com. He leads the architecture and product management teams, working closely with business development, marketing, sales, services and support.

Evers' career in the software industry spans nearly 20 years and three continents (Australia, Europe and North America). In that time he has had significant international experience, living and working in Australia, The Netherlands, the United Kingdom and the United States. He's been the Lead Architect for Cronacle since 2005. As CTO, Evers has managed an international team of around 40 development experts for Redwood since 2010. As a seasoned innovator, Evers provides critical architectural advice to many of Redwood's complex enterprise clients.

Aside from Redwood, Evers' experience includes product development and management for technologies in the financial services, ISP, and music publishing industries. He has worked on

JSR 236: Concurrency Utilities for Java™ EE, JSR 237: Work Manager for Application Servers, and has participated as a speaker at JavaOne. Technically speaking, Evers is primarily a Java and C programmer, having used both throughout his career.

"I'm proud to have been a part of the team that landed Redwood's reseller and OEM agreements with SAP®," says Evers. He explains, "I'm dedicated to creating and launching new products and services that solve real business problems. I work to improve results for our customers every day."
