

JOURNAL ENTRY

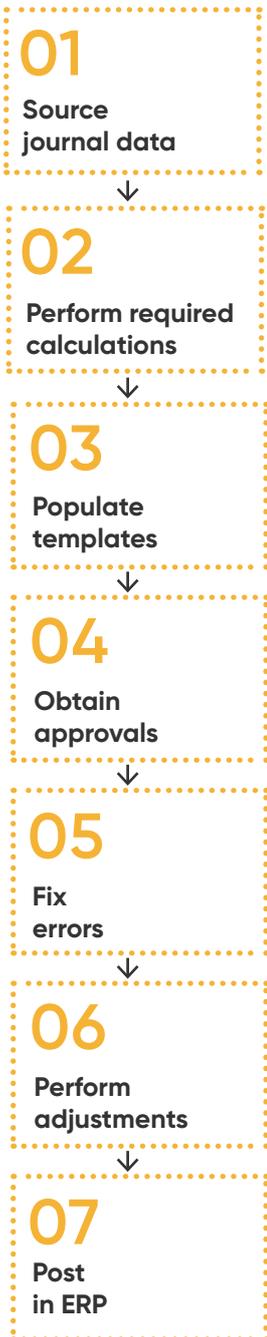

Cloud-based automation eliminates the manual burden of your journals.

REMOVE THE EFFORT FROM YOUR YOUR MONTH-END

Journal entry is an extremely labor-intensive and time-consuming part of a period close. Month-end journals in a large enterprise can easily number in the thousands, often requiring the completion of unwieldy data validations, error corrections and approval routing being uploaded to an ERP system for posting. While some journal activity is automated within ERP systems, finance teams can spend days just collating the data needed to calculate accruals, prepayments and adjustments before month-end.

A TYPICAL PROCESS

Delays in collating data from across the organization can lead to estimates being made as business units fail to meet their deadlines. Furthermore, some ERP systems also have a limit on the number of lines that can be uploaded in a single instance, making journal entry extremely time consuming.

The risk of error is increased and timely completion is threatened by the lack of visibility over controls, missing documentation, estimates based on very old assumptions, and the inability to check every line of a journal.

Many organizations use point solution applications to post, validate and approve journals, but that's only 20-30% of the effort. These application don't address the complex calculations for many requiring closing journals.

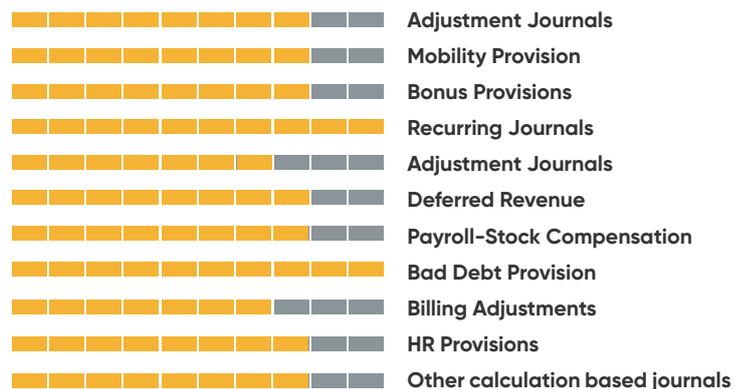

Redwood's advanced automation takes over that work. It's not another layer between you and your business. Instead, it's a tireless engine that powers through repetitive tasks without errors. Employees previously occupied by keeping data moving are now freed to perform higher-value tasks, such as reviewing reports and complex exceptions.

DESIGNED FOR FINANCE

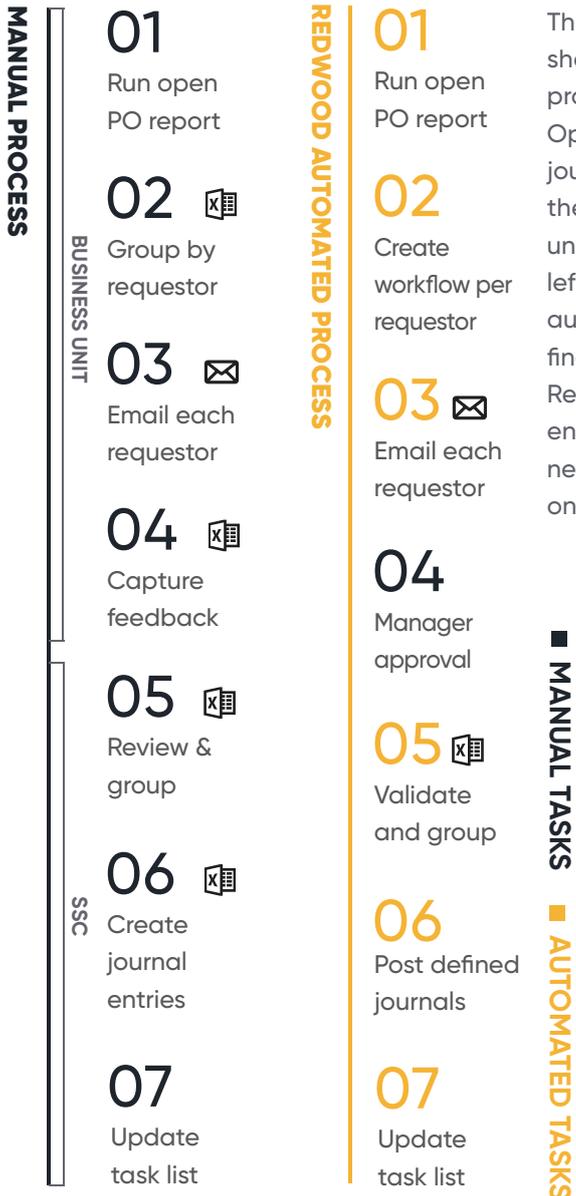

Redwood's SaaS-based solution bring financially intelligent automation to journal calculation, entry and posting processes. It seamlessly leverages the capability of underlying ERP systems and 'understand' system structures, data and metadata. The ability to collate, calculate and manage exceptions reduces the manual workload by 80-100%.

JOURNAL ENTRY:*
~80%
AUTOMATION

*Typical examples of journal entry processes

EXAMPLE PO ACCRUAL PROCESS

The example to the left shows a typical accrual process – in this case, Open PO Accrual. Most journal entry systems leave the work of the business unit (as depicted to the left) totally manual, while automating only the final few steps. Instead, Redwood automates the entire process, leaving necessary approvals as the only required manual step.

REDWOOD'S JOURNAL ENTRY KEY FEATURES

Create and store journal templates

Automate population of journal templates from a variety of source systems

Create complex calculation rules that can automate the whole process

Handle errors and remediate with a clear audit trail

Manage workflow and segregate duties

Manage and work within ERP line restrictions and validation rules

Attach and store supporting documents directly into your ERP

“ With Redwood, Faurecia was able to successfully automate 32,000 global manual journal entries per month and onboard 1,300 end users from both the controlling and GBS teams. Of the journal entry processes, 80% are now fully automated, leaving only human review and approvals tasks.

Christophe MacGarry, Global Finance Transformation Director, Faurecia

ABOUT REDWOOD

Finally plug the 'automation gap' that leaves your people with lots of manual work, and liberate your teams from the day-to-day grind and stress of the financial close. Redwood orchestrates and performs the work, so you always achieve an accurate and timely close. Choose from our catalog of pre-automated financial tasks – across Journal Entry, Balance Sheet Certification, Intercompany and Close Checklist Automation – and benefit from our deep integration with SAP®, Oracle, other ERPs and business applications.

Our mission: unleash human potential. We free up the time and resources associated with repetitive manual tasks, so your people can help your company stay ahead. More than 3,000 enterprises trust Redwood to automate their business.
